DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- are rejected under 35 U.S.C. 102(b) as being anticipated by Pontoglio US 4,381,392.

Regarding claim 1, Pontoglio discloses a method for removing contaminants from rubber comprising treating with an organic solvent, wherein the solvent is ethanol (see abstract and summary of invention).

Regarding claim 3, Pontoglio discloses 25 degrees, less than 100 degrees, and about 80 degrees (see Examples and column 2, lines 31-40).

Regarding claim 4, Pontoglio discloses 2 hours (Example 1).

Regarding claims 5-6, Pontoglio discloses carbon tetrachloride (see abstract and summary of invention).

Regarding claim 8, Pontoglio discloses a continuous flow of ethanol (Example 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pontoglio '392.

Regarding claim 2, Pontoglio discloses ethanol passing through the rubber, which would at least suggest flowing through a column to an ordinarily skilled artisan.

Regarding claim 7, Pontoglio discloses rubber, which would at least suggest a rubber gasket to an ordinarily skilled artisan at the time the invention was made.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Specifically, the references of record GB '336, GB '871, and DE '765.
